

Firm Clean Resources RFO Webinar #2 Q&A

November 17, 2021

Question 1: Can you elaborate on how existing vs new resources will be scored, or compensated?

Answer 1a: Compensation: Bidders will submit one price for all attributes besides RA and then another price in \$/kW-month for kW of net qualifying capacity (NQC) RA. The compensation will be in accordance with your bid.

Answer 1b: Scoring: The Joint CCAs recognize the value of existing high-capacity factor resources, but those resources do not meet requirements under the CPUC Decision. The reviewing team has not yet decided on the exact impact of being an existing resource on the scoring, but all existing projects will be discounted by the same amount for this variable.
